ELEPHANT & CASTLE REGENERATION PROJECT

Elephant & Castle is entering the final stages of one of London's most ambitious regeneration initiatives. Launched by Southwark Council in 2010, this £4 billion, 15-year programme is transforming the area into a vibrant, contemporary urban hub, seamlessly blending residential, commercial, and cultural spaces.

The project is expected to deliver approximately 5,000 new homes and generate over 10,000 new jobs, solidifying Elephant & Castle's status as a key destination in central London.

Central to this transformation are two flagship developments:

Elephant Park by Lendlease

This project is delivering around 3,000 new homes, including a mix of private and affordable housing. The development features extensive green spaces, with a new two-acre park at its heart, and incorporates sustainable design principles aiming for net-zero carbon emissions in operation by 2025. To date, over 2,300 homes and 9,000 sq m of retail space have been completed, with the final phases underway.

Elephant & Castle Town Centre by Get Living and Delancey

This redevelopment replaces the former shopping centre with a new town centre comprising over 1,000 homes, a state-of-the-art campus for the London College of Communication, a cinema, music venue, retail and leisure spaces, and a new public square. A new integrated ticket hall for the Northern line is also under construction, enhancing transport connectivity and supporting future infrastructure projects like the proposed Bakerloo line extension.

Infrastructure improvements are integral to the regeneration. Southwark Council, in partnership with Transport for London, is investing approximately £150 million in upgrades, including a new underground station entrance, improved pedestrian crossings, and enhanced cycling routes. These developments aim to create a more accessible and connected environment for residents and visitors alike.
